Description

Arnica Gel will make a great addition to any first aid box. It may offer a lovely soothing feeling when applied to bruises and knocks - perfect for children who will appreciate it's calming action and the human contact as the gel is applied. It's great for adults too - it has natural soothing properties may help to bring out the bruise. Arnica has been used throughout history as a natural pain reliever for strained or tired muscles and joints. Arnica Gel should not be used on broken skin. Paraben free.

60ml.

Reviews

We use this to relieve any sort of bruising, or swelling in the case of sprains; it really works!
This Arnica gel also relieves the arthritis in my hand more effectively than Ibuprofen.
It is a brilliant product which is a must-have in our medicine cabinet.

When I bash into something the first thing I reach for is the arnica. Within minutes the pain in the bruise subsides . Nothing beats it in my opinion.

I didn't get any effect on my wrist pain. No difference when it's on or not. Don't know what else I can use this gel for.
