Description

Amphora's Melt & Pour soap is so easy to use and a great way to create bespoke soaps for yourself or as a unique gift for friends or family. Simply melt in a pan over low heat then pour into a mould to set. You can use any flexible plastic container available from kitchen or cake accessory shops (the new style silicone moulds are perfect) or just used packaging such as chocolate box inserts. Sea shells or small jelly moulds are also good. It's great fun and an ideal way to create tailor made soaps. You can add colour, fragrance and novelties. You can add exfoliants like poppy seeds or something from our new selection of dried herbs. Or of course you can add your own secret recipe of essential oils or a selection from our wide range of synthetic fragrances. Food colouring widely available on the high street is the ideal way to add colour.
