### Description

Traditional Ceramic Fragrancer/Oil Burner Style 3 Our new range of Traditional Fragrancers comes in 3 distinct styles. Safe and secure, they're made with a solid base so that they won't wobble or fall over. Each fragrancer has a recess for a tealight candle and a large bowl on the top for you to add water and oils. The oil is gently heated encouraging the release of the aromatherapy qualities and infusing your space with gorgeous aromas and the wonderful health-giving benefits of the essential oils. Each fragrancer has a pretty floral design which allows the candle light to shine through.

If you use them in a darkened room then the pattern of the fragrancer is thrown on to the wall creating a relaxing and gently hypnotic ambience. To use simply half fill the bowl with water then add 6-10 drops of essential oil (depending on the oil - some are much stronger than others and need only 1 drop).

Visit our Facebook page (<https://www.facebook.com/AmphoraAromatics>) for regular suggestions on essential oil blends to use with your burner.

## Traditional Ceramic Fragrancer/Oil Burner Style 3

---

Lovely design which casts little flower patterns on the wall when lit. The bowl is plenty big enough to hold water for a couple of hours burning time, perfect for kicking back and relaxing in the evenings with your favourite essential oils. I use mine nearly every day with a variety of oils. Love it!
