Description

Witch Hazel is a wonderful ingredient to use in skincare. It has traditionally been used as a natural remedy for skin conditions such as psoriasis, acne, eczema or also in aftershave applications to help cool and calm the skin.

The occurring tannins on Witch Hazel gives is what gives it its natural astringent properties (this is believed to help balance the oil production on the skin, so it may be particularly beneficial to oily and acne prone skin).

Having a bit of a purge after changing skin care products, so needed something to help calm my skin down! Witch Hazel was incredible, it cleared my skin, dried out any break outs, and generally made my skin look fresher! I use every morning and night. the smell is so lovely!
